RESEARCH ARTICLES

Garthe, S., Hüppop, O.
Distribution of ship-following seabirds and their utilization of discards in the North Sea in summer 1–9

Jouventin, P., Capdeville, D., Cuenot-Chaillet, F., Boiteau, C.
Exploitation of pelagic resources by a non-flying seabird: satellite tracking of the king penguin throughout the breeding cycle 11–19

Hosie, G. W., Cochran, T. G.
Mesoscale distribution patterns of macrozooplankton communities in Prydz Bay, Antarctica — January to February 1991 21–39

Bruggemann, J. H., van Oppen, M. J. H., Breeman, A. M.
Foraging by the stoplight parrotfish *Sparisoma viride*. I. Food selection in different, socially determined habitats 41–55

Bruggemann, J. H., Begeman, J., Bosma, E. M., Verburg, P., Breeman, A. M.
Foraging by the stoplight parrotfish *Sparisoma viride*. II. Intake and assimilation of food, protein and energy 57–71

Stoner, A. W., Lally, J.
High-density aggregation in queen conch *Strombus gigas*: formation, patterns, and ecological significance 73–84

Côté, J., Himmelman, J. H., Claereboudt, M. R.
Separating effects of limited food and space on growth of the giant scallop *Placopecten magellanicus* in suspended culture 85–91

Rochette, R., Hamel, J.-F., Himmelman, J. H.
Foraging strategy of the asteroid *Leptasterias polaris*: role of prey odors, current and feeding status 93–100

Abele-Oeschger, D., Oeschger, R., Theede, H.
Biochemical adaptations of *Nereis diversicolor* (Polychaeta) to temporarily increased hydrogen peroxide levels in intertidal sandflats 101–110

McHugh, D., Tunnicliffe, V.
Ecology and reproductive biology of the hydrothermal vent polychaete *Amphisamytha galapagensis* (Ampharetidae) 111–120

Risk, M. J., Sammarco, P. W., Schwarcz, H. P.
Cross-continental shelf trends in $\delta^{13}C$ in coral on the Great Barrier Reef 121–130

Kaiser, M. J., Rogers, S. I., McCandless, D. T.
Improving quantitative surveys of epibenthic communities using a modified 2 m beam trawl 131–138

Pergent, G., Romero, J., Pergent-Martini, C., Mateo, M.-A., Boudouresque, C.-F.
Primary production, stocks and fluxes in the Mediterranean seagrass *Posidonia oceanica* 139–146

Olesen, B., Sand-Jensen, K.
Patch dynamics of eelgrass *Zostera marina* 147–156

Ragueneau, O., De Blas Varela, E., Tréguer, P., Quéguiner, B., Del Amo, Y.
Phytoplankton dynamics in relation to the biogeochemical cycle of silicon in a coastal ecosystem of western Europe 157–172

Jeong, H. J., Latz, M. I.
Growth and grazing rates of the heterotrophic dinoflagellates *Protoperidinium* spp. on red tide dinoflagellates 173–185

Baretta-Bekker, J. G., Riemann, B., Baretta, J. W., Koch Rasmussen, E.
Testing the microbial loop concept by comparing mesocosm data with results from a dynamical simulation model 187–198

NOTES

Wilson, R. P., Culik, B. M., Bannasch, R., Lage, J.
Monitoring Antarctic environmental variables using penguins 199–202

Barshaw, D. E., Able, K. W., Heck, K. L. Jr
Salt marsh peat reefs as protection for postlarval lobsters *Homarus americanus* from fish and crab predators: comparisons with other substrates 203–206

Volume 106 · Number 3 · 1994

RESEARCH ARTICLES

Lavaniegos, B. E.
Dispersion and development patterns in larvae of *Nyctiphanes simplex* (Euphausiacea) in the upwelling region off Baja California 207–225

Kneib, R. T., Wagner, S. L.
Nekton use of vegetated marsh habitats at different stages of tidal inundation 227–238

Netto, S. A., Lana, P. C.
Effects of sediment disturbance on the structure of benthic fauna in a subtropical tidal creek of southeastern Brazil 239–247

Krishnakumar, P. K., Casillas, E., Varanasi, U.
Effect of environmental contaminants on the health of *Mytilus edulis* from Puget Sound, Washington, USA. I. Cytochemical measures of lysosomal responses in the digestive cells using automatic image analysis 249–261

De Vogelaere, A. P., Foster, M. S.
Damage and recovery in intertidal *Fucus gardneri* assemblages following the 'Exxon Valdez' oil spill 263–271

Fong, P., Donohoe, R. M., Zedler, J. B.
Nutrient concentration in tissue of the macroalga *Enteromorpha* as a function of nutrient history: an experimental evaluation using field microcosms 273–281

Forès, E., Christian, R. R., Comín, F. A., Menendez, M.
Network analysis on nitrogen cycling in a coastal lagoon 283–290

Hemminga, M. A., Slim, F. J., Kazungu, J., Ganssen, G. M., Nieuwenhuize, J., Kruyt, N. M.
Carbon outwelling from a mangrove forest with adjacent seagrass beds and coral reefs (Gazi Bay, Kenya) 291–301

NOTE

Conway, D. V. P., McFadzen, I. R. B., Tranter, P. R. G.
Digestion of copepod eggs by larval turbot *Scophthalmus maximus* and egg viability following gut passage 303–309

MARINE ECOLOGY PROGRESS SERIES

HISTORY: Marine Ecology Progress Series (MEPS) was established in response to requests from numerous marine ecologists from all over the world. When founded, MEPS was based on 'Marine Ecology' – the first comprehensive, integrated treatise on life in oceans and coastal waters – conceived, organized and edited by Professor Otto Kinne, and published by John Wiley & Sons.

AIM: MEPS serves as a world-wide forum for all aspects of marine ecology, fundamental and applied. The journal covers: microbiology, botany, zoology, ecosystem research, biological oceanography, ecological aspects of fisheries and aquaculture, pollution, environmental protection, conservation, resource management.
Ecological research has become of paramount importance for man's future. The information presented here should, therefore, encourage critical application of ecological knowledge for the benefit of mankind and, in fact, of life on earth. Marine Ecology Progress Series has received recognition as the leader in its field. The journal strives for

- complete coverage of the field of marine ecology
- the highest possible quality of scientific contributions
- quick publication
- a high technical standard of presentation.

SCOPE: MEPS is international and interdisciplinary. It presents rigorously refereed and carefully selected research articles, reviews and notes, as well as comments, concerned with:

Environmental Factors: Tolerances and responses of marine organisms (microorganisms, autotrophic plants, and animals) to variations in abiotic and biotic components of their environment; radioecology.

Physiological Mechanisms: Synthesis and transversion of organic material (mechanisms of auto- and heterotrophy); thermo-, ion-, osmo- and volume-regulation; stress resistance; non-genetic and genetic adaptation; population genetics; orientation in space and time; migrations; behavior; molecular basis of ecological processes.

Cultivation: Maintenance and rearing of, as well as experimentation with, marine organisms under environmental and nutritional conditions which are, to a considerable degree, controlled; analysis of the physiological and ecological potential of individuals, populations and species; determination of nutritional requirements; ecological aspects of aquaculture; water-quality management; culture technology.

Dynamics: Production, transformation, and decomposition of organic matter; flow patterns of energy and matter as these pass through organisms, populations and ecosystems; biodiversity; variability of ecosystem components; trophic interrelations; population dynamics; plankton ecology; benthos ecology; estuarine and coastal ecology; wadden-sea ecology; coral reef ecology; deep-sea ecology; open-ocean ecology; polar ecology; theoretical ecology; ecological methodology; ecological modelling and computer simulation.

Ocean Management: Human-caused impacts: their role as modifiers and deformers of living systems, their biological consequences and their management and control; inventory of living resources in coastal areas, estuaries and open oceans; ecological aspects of fisheries; pollution of marine areas and organisms; protection of life in the seas; management of populations, species and ecosystems; management of coastal zones and sea areas; biotechnology.

Scientific publications appearing in this journal have been rigorously refereed, carefully quality-improved, and professionally selected by our editorial staff. These publications, and all parts thereof, are protected by copyright. This covers the exclusive rights of the publisher to *reproduce* (by any means, including photographic or electronic), to *distribute* (including via photocopies, reprints, or electronic means), and to *store* on microfilm, in electronic data bases, on video disks, etc., this material. The acceptance regulations of a manuscript for publication automatically include the consent of the author(s) to transfer the copyright to the publisher. Permission for exceptions to these rules must be obtained in writing from the publisher.
In the USA, photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee (US $3.00 per article) is paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA.

Publisher, editors and authors do not accept legal responsibility for errors, omissions or claims, nor do they provide any warranty, express or implied, with respect to information published in MEPS.

CONTENTS

Volume 107 · Numbers 1 and 2 · 1994

RESEARCH ARTICLES

Boehlert, G. W., Mundy, B. C.
Vertical and onshore-offshore distributional patterns of tuna larvae in relation to physical habitat features 1–13

Roméo, M., Mathieu, A., Gnassia-Barelli, M., Romana, A., Lafaurie, M.
Heavy metal content and biotransformation enzymes in two fish species from the NW Mediterranean 15–22

Huntley, M. E., Nordhausen, W., Lopez, M. D. G.
Elemental composition, metabolic activity and growth of Antarctic krill *Euphausia superba* during winter 23–40

Pilditch, C. A., McClatchie, S.
Quantitative analysis of carnivory in the krill *Nyctiphanes australis*, with an examination of the effect of non-preferred phytoplankton alternative prey 41–53

Cochrane, N. A., Sameoto, D. D., Belliveau, D. J.
Temporal variability of euphausiid concentrations in a Nova Scotia shelf basin using a bottom-mounted acoustic Doppler current profiler 55–66

Laprise, R., Dodson, J. J.
Environmental variability as a factor controlling spatial patterns in distribution and species diversity of zooplankton in the St. Lawrence Estuary 67–81

Gordon, N., Angel, D. L., Neori, A., Kress, N., Kimor, B.
Heterotrophic dinoflagellates with symbiotic cyanobacteria and nitrogen limitation in the Gulf of Aqaba 83–88

Kuuppo-Leinikki, P., Autio, R., Hällfors, S., Kuosa, H., Kuparinen, J., Pajuniemi, R.
Trophic interactions and carbon flow between picoplankton and protozoa in pelagic enclosures manipulated with nutrients and a top predator 89–102

Fessenden, L., Cowles, T. J.
Copepod predation on phagotrophic ciliates in Oregon coastal waters 103–111

Poore, A. G. B.
Selective herbivory by amphipods inhabiting the brown alga *Zonaria angustata* 113–123

Pineda, J.
Spatial and temporal patterns in barnacle settlement rate along a southern California rocky shore 125–138

Urban, H.-J.
Upper temperature tolerance of ten bivalve species off Peru and Chile related to El Niño 139–145

Klumpp, D. W., Lucas, J. S.
Nutritional ecology of the giant clams *Tridacna tevoroa* and *T. derasa* from Tonga: influence of light on filter-feeding and photosynthesis 147–156

Dando, P. R., Bussmann, I., Niven, S. J., O'Hara, S. C. M., Schmaljohann, R., Taylor, L. J.
A methane seep area in the Skagerrak, the habitat of the pogonophore *Siboglinum poseidoni* and the bivalve mollusc *Thyasira sarsi* 157–167

Dando, P. R., Ridgway, S. A., Spiro, B.
Sulphide 'mining' by lucinid bivalve molluscs: demonstrated by stable sulphur isotope measurements and experimental models 169–175

Holmer, M., Kristensen, E.
Coexistence of sulfate reduction and methane production in an organic-rich sediment 177–184

Boucher, G., Clavier, J., Garrigue, C.
Oxygen and carbon dioxide fluxes at the water-sediment interface of a tropical lagoon 185–193

REVIEW

Duarte, C. M., Marbá, N., Agawin, N., Cebrián, J., Enríquez, S., Fortes, M. D., Gallegos, M. E., Merino, M., Olesen, B., Sand-Jensen, K., Uri, J., Vermaat, J.
Reconstruction of seagrass dynamics: age determinations and associated tools for the seagrass ecologist 195–209

Volume 107 · Number 3 · 1994

RESEARCH ARTICLES

Thrush, S. F., Pridmore, R. D., Hewitt, J. E., Cummings, V. J.
The importance of predators on a sandflat: interplay between seasonal changes in prey densities and predator effects 211–222

Mathers, E. M., Houlihan, D. F., Burren, L. J.
RNA, DNA and protein concentrations in fed and starved herring *Clupea harengus* larvae 223–231

Coyle, K. O., Highsmith, R. C.
Benthic amphipod community in the northern Bering Sea: analysis of potential structuring mechanisms 233–244

Lindley, J. A., Williams, R.
Relating plankton assemblages to environmental variables using instruments towed by ships-of-opportunity 245–262

Williams, R., McCall, H., Pierce, R. W., Turner, J. T.
Speciation of the tintinnid genus *Cymatocylis* by morphometric analysis of the loricae 263–272

Culverhouse, P. F., Ellis, R. E., Simpson, R. G., Williams, R., Pierce, R. W., Turner, J. T.
Automatic categorisation of five species of *Cymatocylis* (Protozoa, Tintinnida) by artificial neural network 273–280

Dunton, K. H., Tomasko, D. A.
In situ photosynthesis in the seagrass *Halodule wrightii* in a hypersaline subtropical lagoon 281–293
